

Broward Health Organization Research Report

By: Xzavier Carter, Andres Zamora, James Harris, Zachary Seixas, Zack Parman, Elijah Lawrence

CEO: Matthew Garner is the CEO of Broward Health North before that he served as president and CEO of North Shore Medical Center in Miami. Garner was also a chief operating officer at Florida Medical Center in Lauderdale Lakes. He also earned a Bachelor of Science in Health Services Administration from the University of Central Florida and a Master of Health Administration from the University of Florida.

CIO: Steven Travers is the main guy behind managing information systems, medical systems, office automations and data telecommunications. He has immense background of being a CIO from being one at Alabama-based USA Health, it's an academic health system in upper gulf coast. Steven brings a high level of leadership, Management skill and very high knowledge gage of health systems.

CNO: Eileen Manniste, the chief nursing officer at Broward Health North, aspired to be a nurse since she was a teenager. Previously, she was a CNO at HCA East Florida where she earned 25 years of experience. Eileen earned a Bachelor of Science degree at Nova Southeastern University and a Master of Science from Nova Southeastern University.

Main Tech usage in Broward Health

The healthcare system has recently implemented cutting-edge surgical tools, including the da Vinci robotic surgical system and internal magnetic navigation systems. These technologies enable surgeons to perform complex procedures with greater precision and less invasiveness, potentially leading to better outcomes and faster recovery times. For instance, if a patient is scheduled for minimally invasive surgery, they may benefit from the da Vinci system's capabilities. Understanding these technological advancements can help patients feel more informed and comfortable about their upcoming procedures. Additionally, patients should be prepared to engage with digital health records and potentially telemedicine options, as Broward Health continues to integrate modern healthcare technology into its services.

New Epic System

Epic is a cloud-based EHR solution catering to a number of specialties. Epic is in use across a broad range of practices, from community hospitals and independent practices to multi-specialty hospital groups and hospice care providers. Broward uses the MyChart system on

www.browardhealth.org; MyChart is an app/website that can be mainly used to schedule appointments, make online diagnoses, and talk to providers online to help with the process of the diagnosis. It offers the standard range of 'core' EHR features, and practices can add modules depending on specialty. Epic has a strong focus on patient engagement and facilitating remote care.

Broward Health Facts

The Broward Health Foundation is a 501(c)(3) nonprofit organization whose mission is to improve the health of its community by providing resources to promote, support, and enhance the programs and initiatives of Broward Health. Founded in 1938, Broward Health has been a trusted leader in healthcare for over 85 years, serving the South Florida community with compassion, expertise, and innovation. It is committed to delivering high-quality care through advanced technology and a patient-first approach. With a network of hospitals and specialized services, Broward Health is dedicated to improving the health and well-being of those we serve.
